Maintaining a healthy weight depends on achieving energy balance—balancing the amount of energy burned and the food consumed in your day. To stop weight gain, most Americans need to do just two simple things:

- » Add 2,000 more steps each day
- » Eat 100 fewer calories daily

Small changes in the types of foods you eat and in the portion sizes you choose will quickly add up to 100 reduced calories, or even more!

Just make small changes each day and you'll see how easy it can be to achieve energy balance.

**\*Tips are meant to help reduce daily caloric intake. No one tip, by itself, will equal 100 calories exactly, but selecting a few of your favorites each day will get you well on your way!**
